RITHTHIKA BASKARAN

FULL STACK DEVELOPER (MERN)

Portfolio | LinkedIn | riththikabaskaran0428@gmail.com

SUMMARY

Motivated Full Stack Developer specializing in MERN stack with hands-on experience building scalable web applications. Strong understanding of modern wen technologies, REST APIs and role-based systems. Passionate about solving real-world problems using AI-integrated applications and clean architecture.

EDUCATION

Bachelor of Information Technology
University of Moratuwa | 2025-2028

Full Stack Web Development
Uki Technology School | Sep2025-Apr2026

TECHNICAL SKILLS

- Programming Languages - JavaScript(ES6+), Python(Basic)
- Frontend - HTML5, Bootstrap, React, Next.js, Tailwindcss
- Backend - Node.js, Express, REST API Development
- Database - MongoDB Atlas, MySQL
- Development Tools - Git and GitHub, Postman, Visual Studio Code
- UI/UX Tools - Figma, Canva

SOFT SKILLS

- Problem Solving
- Critical Thinking
- Team Collaboration
- Time Management
- Communication Skills

PROJECT EXPERIENCE

Agreal - Smart Farming & Organic Marketplace Platform
MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, TailwindCSS, JWT

- Developed full-stack MERN application connecting farmers and consumers
- Implemented role-based authentication systems with JWT and secure protected routes
- Built AI-powered crop disease detection system
- Designed nutrient tracking and recommendation system
- Created marketplace for direct farmer-to-consumer transactions
- Designed scalable backend using MVC architecture and RESTful APIs

TalkNode : Realtime Chat Application

Full Stack Project - Next.js, TailwindCSS, TypeScript, Node.js, Express, Socket.IO, MongoDB

- Built a full-stack real-time messaging platform with the MERN stack and socket.IO, supporting one-to-one and group conversions with live message delivery, typing indicators and online/offline presence
- Implemented secure authentication using JWT and bycrypt and verified the same token during the Socket.IO handshake so only authenticated users can connect or read a conversion
- Designed a REST API with EXpress and MongoDB(Mongoose) for user search, conversions, paginated message history, profile, editing, and avatar uploads with multer
- Developed group chat features including group creation, member management, an admin role with admin-only settings and leave-group handling with automatic admin reassignment
- Created a responsive, accessible UI in Next.js and TailwindCSS v4 with light/dark themes, a mobile layout with bottom navigation and swipe actions and loading, empty and connection-lost states
- Deployed the frontend to Vercel and managed the project through Git and GitHub

Riththika OS : Developer-Style Portfolio with Admin CMS

Next.js, React, TailwindCSS, Node.js, Express, MongoDB

- Built the client with Next.js(App Router) and TailwindCSS and a REST API with Express and MongoDB(Mongoose). The public site reads content only through the API and never touches the database directly.
- Created an admin dashboard to manage projects, case studies, skills, education, certfications, resume, home services, messages and site settings.
- Secured the admin with bcrypt password hashing, JWT in HTTP-only cookies, rate limiting, Zod request validation, CSRF protection and a change-password/ log-out-everywhere feature.
- Implemented image upload and storage for projects covers, screenshots, certificates and profile photos with automatic clean-up of unused images.
- Added a contact form that saves messages to the admin inbox and sends an email alert using Nodemailer.
- Added SEO (sitemap, robots, Open Graph image), loading and error screens, scroll animations with Framer Motion and a persistent light/ dark theme.
- wrote automated tests for both the API and the client and deployed the client and API on Vercel.
